

Keep an eye on your fleet

Trendfire Truck Telematics

Driving daily improvement to your bottom line

Telematics technology has become an indispensable tool for trucking companies, brokers and independent owner-operators seeking profitable revenue growth.

Real time vehicle location tracking, monitoring of power take-off, route planning, driving time, rest periods, messaging, expense reporting, and driver performance analysis and feedback ... the list goes on and on.

At Trendfire our mission is to provide the best telematics solution for your ongoing operations; a solution that facilitates your day to day operations while making a significant contribution to your business success.

FULLY INTEGRATED SOLUTIONS

- ✓ Consistent, versatile telematics across truck manufacturers, makes, and models
- ✓ GPS Location monitoring, route tracking, and geofencing
- ✓ Arrival time specification and monitoring
- ✓ Monitoring of power take-off
- ✓ Tracking of tank fill level and fuel consumption
- ✓ Driver evaluation and skills improvement
- ✓ Automated expense reporting
- ✓ Data export to allow your own analyses
- ✓ and much, much more.

Make informed decisions based on data

DRIVING TIME & REST PERIODS

- ✓ Simple, automated, accurate
- ✓ Monitoring driving time, overall working time, breaks, and rest periods
- ✓ Avoidance of needless violations and penalties
- ✓ Remaining driving time continuously available to dispatchers and drivers
- ✓ For US customers, an ELD compliant version is available

Logging driving time was never this easy.

We would welcome the opportunity to discuss with you the wide range of applications for our telematics systems within your business, and the significant benefits you can gain.

Telematics perfected

Trendfires' hardware and software components, developed in-house, are the key to a complete, reliable, state-of-the-art telematics solution that keeps you on the leading edge.

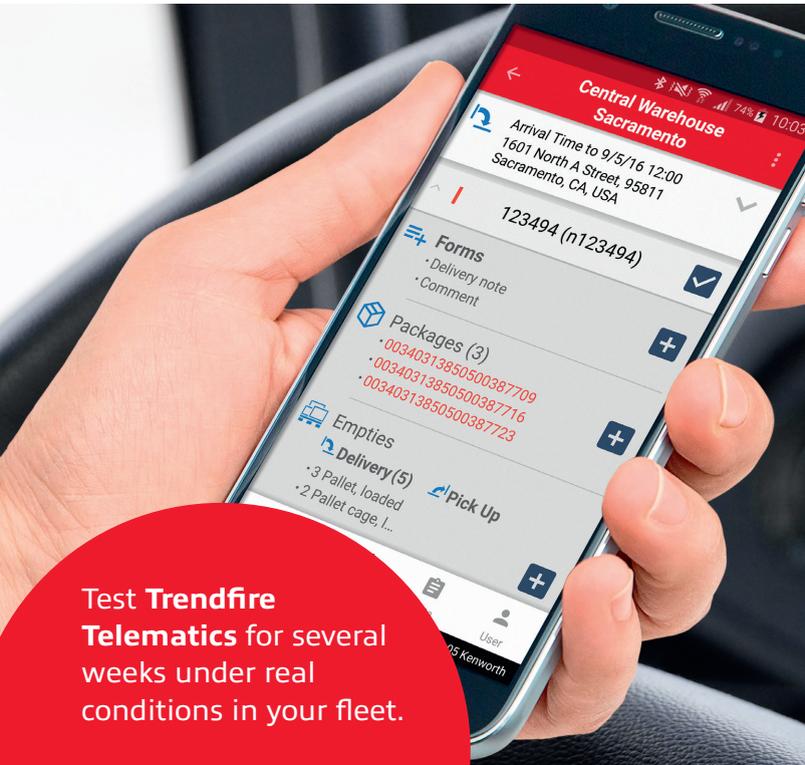

With Trendfire, you can rely on receiving the highest quality, continuous innovation, and quotes and agreements that are straightforward, easy to understand, and free of hidden costs.

The wide range of functionality, our vehicle-specific plug-and-play interfaces, and our 5-year warranty on our telematics hardware make Trendfire the perfect partner for your fleet management.

IMPROVE ROI THROUGH IMPROVED DRIVER PROFICIENCY

- ✓ **Accurate and fair**
- ✓ Reduces fuel consumption and costs for maintenance, repair, and tires
- ✓ Increases safety through more anticipatory driving
- ✓ Considers the distance driven (incl. number of stops, topography, speed)
- ✓ **As unique as your company:** Tailor the parameters used to assess driving style and their priorities to your company's specific needs.
- ✓ Easy for both management and drivers to understand
- ✓ Improves driver skills: Basis for targeted driving training and further education
- ✓ Provides the basis for a performance-based incentive system

TRENDFIRE DRIVER APP

Connects the street and the office

- ✓ Powerful mobile telematics app
- ✓ **Multi-media communication with drivers** (text, images, files and locations)
- ✓ **Easy logging of driving and resting periods**
- ✓ **Order processing** and documentation
- ✓ Flexible forms: **checklists**, pre-departure checks
- ✓ View current **driver rating**
- ✓ Integrated document management
- ✓ **Truck navigation**

Test **Trendfire Telematics** for several weeks under real conditions in your fleet.
